DINESH G

Artificial Intelligence & Data Science Student | AI/ML | Software Development

9597026618 | Chennai, India | dineshsekar6618@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Artificial Intelligence and Data Science student with experience in developing AI/ML, data-driven, web, and software-based projects. Passionate about problem-solving, hackathons, and building practical technology solutions. Experienced in Python, machine learning, data analysis, databases, APIs, cloud platforms, and modern development tools.

EDUCATION

Rajalakshmi Engineering College, Chennai | B.Tech. Computer Science Engineering | 2024–2028

Elite School, Chennai | Higher Secondary Education | 2024

TECHNICAL SKILLS

Programming	Python, Java, C/C++
Web Development	HTML, CSS
Database	MySQL, MongoDB
AI / ML	Machine Learning, Data Analysis, Computer Vision
Tools	Git, GitHub, VS Code
Cloud / Backend	Supabase, Cloudflare Workers, REST APIs

PROJECTS

CLICK – Programming Using C Learning Platform

JavaScript • Supabase • Cloudflare Workers • VS Code Extension API

- Built a C-learning platform for college students with microlearning, tests, and progress tracking. Shipped as a PWA, Windows .exe, Android .apk, and TypeScript VS Code extension for in-editor practice, backed by Supabase Postgres/serverless services and session authentication on Cloudflare Workers.

SEVPS – Smart Emergency Vehicle Priority System

Django • DRF • Django Channels • PostgreSQL/PostGIS • React • Docker

- Developed a real-time emergency vehicle platform providing ambulances with traffic-signal priority, fastest routing over PostGIS spatial data, and live hospital readiness tracking. Included admin, driver, paramedic, and hospital dashboards with WebSocket updates, push notifications, and explainable ML estimators.

GramSentinel – Multi-Agent Rural Health Warning System

React • TypeScript • Django REST • PostgreSQL • Django Channels • WebSockets

- Developed a multi-agent rural healthcare platform connecting ASHA/health-worker observations with community-level early-warning intelligence. Combined individual RuralCare decision support, multi-source signal correlation, deterministic safety verification, real-time dashboards, and human-led investigation.

EventFlow – Intelligent College Event Management Platform

JavaScript • SQL • CSS • HTML • Markdown • JSON

- Built a centralized platform for college events, registrations, and participants with QR-based attendance, scheduling, team management, certificates, and feedback. Integrated AI-powered event planning, recommendations, analytics, and responsive role-based access for students, organizers, and administrators.

RoadMind AI – AI-Powered Road Damage Detection & Safer Route Recommendation

Python • Computer Vision • Machine Learning • GIS

- Built an AI-powered road intelligence platform that detects and classifies road damage from images, predicts future deterioration, assesses severity, prioritizes maintenance, and visualizes road conditions on an interactive map. Recommends safer alternative routes using road-risk data.

HACKATHONS & ACHIEVEMENTS

VMEDITHON V3.0 – Finalist | **CIH'26 – Finalist**

EXPERIENCE / INTERNSHIP

IoT Intern – Trios Technologies Pvt. Ltd. | 17 December 2025 – 3 January 2026

- Worked on IoT-based projects involving connected devices, sensors, and data-driven solutions.
- Gained hands-on experience in IoT technologies, device integration, and real-time data handling.
- Collaborated with the technical team to understand, develop, test, and troubleshoot IoT applications.
